EXPERIENCE

Full Stack Developer

Rankpilot

- Built customer-facing features for an AI-powered SEO platform covering content generation, optimization, scheduling, publishing, and analytics using React, Node.js, MongoDB, and LLM APIs.
- Built integrations with Shopify, WordPress, Webflow, Wix, Google Analytics, and Google Search Console, including secure OAuth flows and automated performance tracking.
- Developed production-ready SaaS features including background job processing, Stripe subscriptions, analytics dashboards, secure REST APIs, and deployment to DigitalOcean Droplets.

Frontend Developer

FOGO

- Revamped the admin dashboard's UI using Next.js and shadcn/ui, implementing Figma designs to deliver a fresh, modern look for the client's website redesign.
- Developed responsive tables and forms for team data management, integrating with an Express backend.
- Gained hands-on experience translating Figma designs into pixel-perfect, user-friendly interfaces, enhancing data visualization and administrative workflows.

PROJECTS

Twitter Clone

- Built a full-stack Twitter clone using Next.js, React, TypeScript, PostgreSQL, Prisma, and Supabase.
- Implemented social authentication, profiles, follow relationships, and post interactions including replies, likes, reposts, bookmarks, and deletion.
- Improved responsiveness and UX with infinite scrolling, optimistic updates, image uploading/cropping, dynamic routing, and TanStack Query caching.

Public Chat Room

- Built a responsive real-time public chat application using React, TypeScript, Tailwind CSS, and Firebase Firestore.
- Integrated Google authentication with Firebase Auth and implemented secure user-specific message creation, editing, and deletion.
- Enhanced the chat experience with live Firestore updates, animated messages, link detection, timestamps, and responsive loading/empty states.

Cricket Stats

- Built a responsive full-stack cricket scoring and analytics platform using React, TanStack Start, TypeScript, Tailwind CSS, and PostgreSQL.
- Developed server-side statistical analysis for batting, bowling, fielding, rankings, attendance, team performance, and player comparisons with dynamic filtering.
- Designed a relational cricket data model with ZenStack ORM and created interactive scorecards, player profiles, sortable tables, and expense visualizations.

SKILLS

Frontend: Next.js, React.js, Tanstack Start, Typescript, Tailwindcss, Javascript, HTML, CSS

Backend: Node.js, Prisma, Supabase, Convex, Firebase, Appwrite, PostgreSQL, MongoDB

Tools & Libraries: Cloudflare, Vercel, Git, Bun, Tanstack Query, shadcn/ui

EDUCATION

B.S Computer Science

Virtual University

2022 - 2026
